Collections

A FAMILY *business*

The heritage of De Rosa proudly spans eighty years, when in 1945 Jorge De Rosa Thompson was inspired by the craft of ceramic design.

Now run by his son **Jorge De Rosa Jr** and his granddaughters **Agustina & Carolina De Rosa**, it remains a well-established, family run business producing timeless handmade ceramic figurines, evolving and reinventing ceramic design through bright colors, original art forms and textures.

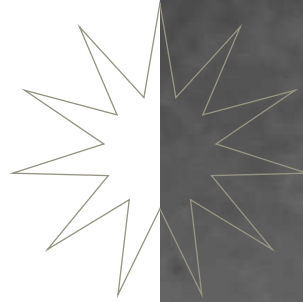

Our figurines are internationally recognized for their artistic and elegant use of platinum, gold, and vibrant enamel glazes in the creation of our hand-made ceramic figurines.

Every De Rosa piece is the result of a unique worldwide process of the highest technical and artistic quality. Each figurine is carved and painted by hand, insuring no two subjects are ever carved exactly the same.

These brightly colored jewels in the world of hand-crafted ceramic design are made exclusively in our workshop in the state of **Canelones, Uruguay**.

THE *process* OF CREATION

The process of creation starts with our artists working the clay, modeling it in exploration of the form, of the life which gradually takes shape under their skillful hands, giving birth to a new born figurine.

Once the design is approved, a mold is produced in plaster to reproduce the piece. The mold is filled with the liquid paste called slip. After six hours the paste is set and ready to be removed from its mold.

Our special carving process is what makes our pieces so unique. The artisans hand carve in meticulous detail, giving each piece its own individual character and personality and achieving unique, unrepeatable creations. After nearly fifteen hours inside the kiln for the first time, reaching a temperature of 1000°C, the biscuit is hand-painted with a colorful variety of ceramic slips and bright enamel glazes that accentuate

every detail obtained in the carving process. When the hand-painting is completed the figurine is fired in the kiln for a second time.

The application of gold and platinum marks the final step. These precious metals are used not only to accent the personality of the figurines, but to transform the De Rosa Collection into the brightly colored jewels in the world of hand-crafted ceramic design.

Before each piece is manually packed, a final selection process takes place before the piece is identified as best quality. Limited Editions include a special certificate signed by our designer that guarantees the authenticity and quality of the piece.

Aesthetic and sophisticated gilding have been brought together in our distinguished designs that please both the eye and the heart.

THE *minis*
COLLECTION

The *minis* collection

Small in size, extraordinary in detail.

Each miniature figurine from the De Rosa Minis Collection is hand-carved and hand-painted in Uruguay, combining joyful character with our signature enamel glazes and accents in gold and platinum.

Though petite, every piece carries the same artistry, craftsmanship, and meticulous detail found in all De Rosa sculptures, a true celebration of our tradition in a charming small scale.

From playful owls to charming turtles and dolphins, these tiny jewels bring the magic of nature to life, designed to be collected, gifted, and treasured.

Create your own world of Minis...

Every piece has a story to tell.
